

2 Ply Monofilament White Bare x Bare

Application

Food conveying/processing in general.
 Low friction coefficient, suitable for accumulation.

Technical Data

	Imperial
Working Tension	120 PIW
Number of Plies	2
Top Surface	Fabric
Bottom Surface	Fabric
Overall Gauge (Approximate)	0.06 in.
Weight (Approximate)	0.30 lbs/sq.ft.
Bottom Coefficient of Friction	0.22 (approx.)
Minimum Recommended Pulley Diameter	1.18 in.
Working Temperature	23 to 194 F
Joining Method	Finger Splice
